## Strong Interest Inventory ${ }^{\circledR}$ Profile

strong

## HOW THE STRONG CAN HELP YOU

The Strong Interest Inventory ${ }^{\otimes}$ instrument is a powerful tool that can help you make satisfying decisions about your career and education. Whether you are just starting out in your career, thinking about a change, or considering education options for career preparation, you can benefit from the wealth of information reflected in your Strong results. Understanding your Strong Profile can help you identify a career focus and begin your career planning and exploration process.
Keep in mind that the Strong measures interests, not skills or abilities, and that the results can help guide you toward rewarding careers, work activities, education programs, and leisure activities-all based on your interests. As you review your Profile, remember that managing your career is not a one-time decision but a series of decisions made over your lifetime.

## HOW YOU WILL BENEFIT

The Strong can be a valuable tool in helping you identify your interests, enabling you to

- Achieve satisfaction in your work
- Identify career options consistent with your interests
- Choose appropriate education and training relevant to your interests
- Maintain balance between your work and leisure activities
- Understand aspects of your personality most closely associated with your interests
- Determine your preferred learning environments
- Learn about your preferences for leadership, risk taking, and teamwork
- Use interests in shaping your career direction
- Decide on a focus for the future
- Direct your own career exploration at various stages in your life

## HOW YOUR RESULTS ARE ORGANIZED

## Section 1. General Occupational Themes

Describes your interests, work activities, potential skills, and personal values in six broad areas: Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C).

## Section 2. Basic Interest Scales

Identifies specific interest areas within the six General Occupational Themes, indicating areas likely to be most motivating and rewarding for you.

Section 3. Occupational Scales
Compares your likes and dislikes with those of people who are satisfied working in various occupations, indicating your likely compatibility of interests.

## Section 4. Personal Style Scales

Describes preferences related to work style, learning, leadership, risk taking, and teamwork, providing insight into work and education environments most likely to fit you best.

## Section 5. Profile Summary

Provides a graphic snapshot of Profile results for immediate, easy reference.

## Section 6. Response Summary

Summarizes your responses within each category of Strong items, providing data useful to your career professional.

Note to professional: Check the Response Summary in section 6 of the Profile before beginning your interpretation.

The General Occupational Themes (GOTs) measure six broad interest patterns that can be used to describe your work personality. Most people's interests are reflected by two or three Themes, combined to form a cluster of interests. Work activities, potential skills, and values can also be classified into these six Themes. This provides a direct link between your interests and the career and education possibilities likely to be most meaningful to you.
Your standard scores are based on the average scores of a combined group of working adults. However, because research shows that men and women tend to respond differently in these areas, your interest levels (Very Little, Little, Moderate, High, Very High) were determined by comparing your scores against the average scores for your gender.

## THEME DESCRIPTIONS

The charts above display your GOT results in descending order, from your highest to least level of interest. Referring to the Theme descriptions provided, determine how well your results fit for you. Do your highest Themes ring true? Look at your next highest level of interest and ask yourself the same question. You may wish to highlight the Theme descriptions above that seem to fit you best.

## BASIC INTEREST SCALES

The Basic Interest Scales represent specific interest areas that often point to work activities, projects, course work, and leisure activities that are personally motivating and rewarding. As with the General Occupational Themes, your interest levels (Very Little, Little, Moderate, High, Very High) were determined by comparing your scores against the average scores for your gender.

As you review your results in the charts below, note your top interest areas and your areas of least interest, and think about how they relate to your work, educational, and leisure activities. Take time to consider any top interest areas that are not currently part of your work or lifestyle and think about how you might be able to incorporate them into your plans.

This section highlights your Profile results on the Occupational Scales of the Strong. On the following pages you will find your scores for 130 occupations. The 10 occupations most closely aligned with your interests are listed in the summary chart below. Keep in mind that the occupations listed in your Profile results are just some of the many occupations linked to your interests that you might want to consider. They do not indicate those you "should" pursue. It is helpful to think of each occupation as a single example of a much larger group of occupational titles to consider.
Your score on an Occupational Scale shows how similar your interests are to those of people of your gender who have been working in, and are satisfied with, that occupation. The higher your score, the more likes and dislikes you share with those individuals. The Theme codes associated with each occupation indicate the GOTs most commonly found among people employed in that occupation. You can review your top occupations to see what Theme codes recur and then explore additional occupational titles not included on the Strong that have one or more of these Theme letters in common.

Physician (IAR)
Chemist (IR)
English Teacher (ASE)

As you read through your Occupational Scales results on this and the following pages, note the names of those occupations for which you scored "Similar." Those are the occupations you might want to explore first. Also consider exploring occupations on which you scored in the midrange, since you have some likes and dislikes in common with people in those occupations. You might also consider occupations of least interest or for which you scored "Dissimilar"; however, keep in mind that you are likely to have little in common with people in these types of work and probably would contribute to such occupations in a unique way. Your career professional can guide you further in the career exploration process.

Click the name of any of the occupations in your top ten list above to visit the \(\mathrm{O}^{*} \mathrm{NET}^{\mathrm{TM}}\) database (http://www.onetonline.org) and see a summary description of that occupation. Learn about occupations by visiting reputable Web sites such as O*NET. You can also find career information in a public library, in the career library of a college or university near you, or in a professional career center or state or local government job agency. Supplement your research by talking to people who are working in the occupations you are considering. These people can describe their day-to-day work and tell you what they like and dislike about the occupation.

The Personal Style Scales describe different ways of approaching people, learning, and leading, as well as your interest in taking risks and participating in teams. Personal Style Scales help you think about your preferences for factors that can be important in your career, enabling you to narrow your choices more effectively and examine your opportunities. Each scale includes descriptions at both ends of the continuum, and the score indicates your preference for one style versus the other.

Your scores on the Personal Style Scales were determined by comparing your responses to those of a combined group of working men and women.
\begin{tabular}{l} 
YOUR PERSONAL STYLE SCALES PREFERENCES \\
\hline 1. You likely prefer working with people. \\
2. You seem to prefer to learn by doing. \\

\section*{USING YOUR PERSONAL STYLE SCALES}

Next, use your Personal Style Scales to identify the specific ways you prefer to approach whatever academic courses, majors, or jobs you undertake.
\begin{tabular}{l:c}
\hline PERSONAL STYLE SCALE & PREFERENCES/ACTIVITIES \\
\hline & Your score suggests a preference for working closely or frequently with people rather than working \\
Work Style & alone. \\
& \begin{tabular}{l} 
You may prefer academic activities that focus on interpersonal interactions, such as study groups, \\
group assignments, and helping others, rather than studying and researching on your own.
\end{tabular} \\
\hline Learning Environment & Your score suggests a preference for applying learning to everyday life and learning through hands-on \\
& experience. \\
& You may prefer to learn through laboratory courses, internships, and work-study programs rather than \\
through traditional classroom lectures and readings.
\end{tabular}
