

# MBTI® Profile COLLEGE EDITION

Your personality type is made up of your preferences in four separate categories that together describe how you typically go about noticing and thinking about things and interacting with people and the world. ## MBTI® Profile COLLEGE EDITION

The MBTI assessment not only reports your preferences but also tells how clear you were in selecting each preference over its opposite. This is called the *preference clarity index*, or pci. The graph below depicts your pci results in each of the four categories.

### PCI RESULTS: ISTJ

Some of the personality characteristics typically associated with ISTJ are summarized below. Do they seem to fit? Many find that their MBTI results describe them quite well. Others find that changing a letter or two helps them arrive at a type that more accurately describes them. Your counselor can give you more insight into the type described and/or help you find a better match if needed.
